Skills

Backend: Node.js, Flask, Django, Spring, Postgres, MongoDB, ORM, GraphQL, AWS | **Frontend:** React, Vue.js, Angular.js, Next.js, Remix, Nuxt.js, HTML 5, CSS, SCSS, TailwindCSS, Design Systems, SSR | **DevOps:** Docker, Kubernetes, CI/CD, GitHub Actions, GitLab CI, Jest, Vitest, Cypress | **Programming Languages:** JavaScript, TypeScript, C, Python, Java | **Languages:** Portuguese, English

Experience

Collectly | Santa Monica, CA, USA

Senior Software Engineer | 12/2024 - Present

- Python, Flask, Postgres, RabbitMQ, AWS

Hinge Health | San Francisco, CA, USA

Fullstack Software Engineer II | 11/2022 - 01/2024

- Developed automation for various manual internal processes, more than doubling our capacity to serve our users with new content using TypeScript and Node.js
- Fixed visual and logical issues, elevating the UI quality and improving performance by cutting loading times of a large microservice-based React Native project by 30%
- Ensured quality of new features with zero regressions by developing a full suite of unit and integration tests with Jest
- Spearheaded the development of an internal tool to aid physical therapists in providing content more tailored to individual users, using React and Nest.js
- Interviewed applicants and trained new hires, accelerating the onboarding process and passing on valuable knowledge

Overflow App Inc | San Jose, CA, USA

Fullstack Software Engineer | 12/2019 - 08/2022

- Delivered the full specifications and designs for a safe, advanced, and modular authentication system with support for RBAC, 2FA, and email/phone verification
- Built our team's internal dashboard, increasing our capacity to process donations by 300%, using Vue.js and Express
- Enabled multiple external API integrations by creating project specs based on customer requirements
- Thoroughly documented the server creation and maintenance processes, making it easier for teammates to contribute to our Nest.js backend
- Performed a server migration with 0% downtime on all services for customers through careful application of networking skills and DNS caching knowledge
- Single-handedly created a fast, modular CI/CD setup on GitLab that powered all of the company's applications

Lux Control | Uberlândia, MG, Brazil

Software Engineering Intern | 06/2017 - 07/2017

- Performed QA on live frontend systems and submitted CSS fixes for review
- Developed automation solutions with microcontrollers in C

Projects

- [Tasks.app](#) — Fullstack Trello alternative, built with Nuxt.js, TailwindCSS, TypeScript, Postgres. [Check it out live.](#)
- [Black Box](#) — A native terminal emulator for Linux with 200K+ downloads, built with Vala, C, and CSS.
- [Personal Website](#) — My portfolio & blog, built with Nuxt.js, TailwindCSS.

Education

B.E. Software Engineering. INFNET, RJ, Brazil | 04/2024 — present

Software Engineering. 42 Silicon Valley, CA, USA | 02/2019 — 02/2020

Technician IT. IFTM, MG, Brazil | 01/2014 — 12/2017 | **BTEC IT Level 2.** UTC, Reading, UK | 09/2015 — 07/2016
